

SULTANATE OF OMAN

TARBIYAT

NATIONAL YOUTH TECH MISSIONS

SCHOOL & COLLEGE

NIZWA, AL DAKHILIYAH GOVERNORATE

A World-Class National Youth R&D Campus — Oman Vision 2040

"From India with Respect — For Oman with Commitment"

Idea Originated & Concept Architected by Dr. Sudhir Pawar (alias Dr. Salahuddin)

Submitted To	Ministry of Education (MoE) MoHERI MOCIIP — Sultanate of Oman
Submitted By	Tarbiyat Sociotech Foundation, New Delhi, Republic of India
Concept Author	Dr. Sudhir Pawar (alias Dr. Salahuddin) — Founder & Concept Architect
Author Credentials	20+ Years in Educational Institutional Development INSPIRE Method™ Author of Institutional Compliance Manual & Handbook for India Established & Guided Numerous Educational Institutions
Implementation	Global Industry Leaders & Innovators — Core Implementation Team
Total Project Investment	OMR 38,500,000 (approx. ₹840 Crore) — World-Class Campus
Minimum Engagement	10 Years — Reviewed Mutually at Completion
Target Opening	September 2028 — Nizwa, Sultanate of Oman
Partnership Model	Government-Owned Zero Equity Academic & Technical Partnership Only

Tarbiyat Sociotech Foundation

New Delhi, Republic of India

COVERING LETTER

To,
His Excellency
The Ambassador
Embassy of the Sultanate of Oman
New Delhi, Republic of India

Subject: Proposal for Establishing the Tarbiyat National Youth Tech Missions School & College, Nizwa — A World-Class National Youth R&D Campus Aligned with Oman Vision 2040

Your Excellency,

With deepest respect for the Sultanate of Oman and its visionary leadership under His Majesty Sultan Haitham bin Tarik, we are honoured to present this comprehensive proposal for the establishment of the Tarbiyat National Youth Tech Missions School & College in Nizwa, Al Dakhiliyah Governorate — a world-class, government-owned, mission-driven Youth Technology Campus that stands in a class of its own, globally.

This is not a school with better laboratories. This is a national Youth R&D Institution where Omani children from Grade 5 through an applied technology college become junior researchers, innovators, and nation-builders — solving real challenges of Oman's communities and industries, guided by the values of Tarbiyat — character, ethics, and Omani identity.

The concept has been originated and architecturally designed by Dr. Sudhir Pawar (alias Dr. Salahuddin), who brings over 20 years of dedicated experience in educational institutional development across India. He has established and guided numerous educational institutions, authored the INSPIRE Method™ framework, and authored the Institutional Compliance Manual & Handbook for India — making him one of the foremost practitioners in mission-driven institutional design in the region.

The implementation of this campus will be led by a handpicked team of global industry leaders and domain innovators — professionals with demonstrated track records in world-class educational institution building, advanced technology lab commissioning, and national human capital programmes.

We respectfully request Your Excellency's facilitation of a formal presentation to the Ministry of Education, MoHERI, and MOCIIP to present this concept in full, and seek the Government of Oman's direction to proceed.

Respectfully submitted,

Dr. Sudhir Pawar (alias Dr. Salahuddin)

Founder & Concept Architect — Tarbiyat National Youth Tech Missions Campus
CEO & Director — SR World Solutions | IRME Institute
Author: INSPIRE Method™ | Institutional Compliance Manual & Handbook

On behalf of: Tarbiyat Sociotech Foundation, New Delhi, Republic of India

1. EXECUTIVE SUMMARY

THE BIG IDEA

Tarbiyat National Youth Tech Missions School & College is Oman's first Government-Owned, World-Class National Youth R&D Campus. From Grade 5 through a post-Grade 12 applied technology diploma, every Omani student on this campus becomes a junior researcher, innovator, and nation-builder — solving real problems for the Sultanate. The campus is built to world-class infrastructure standards: from AI-powered labs, a grand auditorium, full boarding (hostel) facilities, 24×7 solar-backed power, and a Nizwa Fort-inspired architectural identity. It is not comparable to any existing school in Oman or the wider region.

Project Name	Tarbiyat National Youth Tech Missions School & College, Nizwa
Location	Nizwa, Al Dakhiliyah Governorate — near UTAS Nizwa
Concept Origin	Dr. Sudhir Pawar (alias Dr. Salahuddin) — 20+ years Institutional Development, INSPIRE Method™
Scale	1,500 students (Grades 5–12) + 400 Applied Tech College students + 500-seat Hostel
Site Area	~60,000 sqm (built-up ~30,000 sqm, G+4, world-class campus)
Ownership	100% Ministry of Education / Government of Oman — from Day 1
Total Investment	OMR 38,500,000 (approx. ₹840 Crore) — World-Class Build
In-Country Value	~85% of total spend within Oman
Omanization	90% Omani staff by Year 3; full Omani leadership by Year 5–7
Implementation Team	Global Industry Leaders & Domain Innovators — handpicked core team resident in Oman
Engagement Period	Minimum 10 Years — mutually reviewed at expiry
Target Launch	September 2028 — Initial cohort of 500 students
Partnership Model	Zero equity, zero profit share — pure academic & technical management

2. VISION, MISSION & CORE OBJECTIVES

2.1 Vision

To be Oman's most advanced, world-class Youth Technology Missions Campus — where every Omani child with curiosity grows into a values-driven innovator, researcher, and technologist serving the Sultanate's Vision 2040 priorities, grounded in faith, culture, and national identity.

2.2 Mission

- ▶ To replace rote-based schooling with a mission-driven, world-class lab-centred learning model where students solve real challenges faced by Omani communities, industries, and government ministries.
- ▶ To deliver a seamless Grade 5 → Grade 12 → Applied Tech Diploma pipeline on one world-class residential campus — without interruption, without relocation.
- ▶ To integrate Tarbiyat — character, ethics, and Omani identity — with cutting-edge technology, building responsible leaders, not merely skilled technicians.

2.3 Core Objectives

Human Capital for Vision 2040	Produce 500+ technology-literate school graduates per year and 250+ applied tech diploma holders by Year 10, ready for Oman's priority sectors.
Youth-Led National R&D	Operate as Oman's first national youth R&D hub — 60–100 mission outputs annually, with 15–20 reaching field pilot or industry deployment.
Omanization of Knowledge & IP	All technical know-how and mission IP anchored within Oman, co-owned by the state and students, under Omani law.
World-Class Infrastructure	Build a campus that rivals the best educational institutions globally — labs, auditorium, hostel, sports, 24×7 power — setting a new national standard.
Tech & Tarbiyat Integration	Embed service, ethics, and identity into every technology mission — directly supporting Vision 2040's social cohesion pillar.
Replicable National Model	A Nizwa demonstration campus that is replicated across governorates as Oman expands its innovation education ecosystem.

3. STRATEGIC ALIGNMENT WITH OMAN VISION 2040

Oman Vision 2040 calls for a high-quality, future-oriented education system; a knowledge-based, innovation-led economy; and a society proud of its identity, culture, and values. This project is a direct institutional response to each of those national priorities:

Vision 2040 Pillar	How This Campus Delivers
Education & Human Capital	Mission-based tech learning across AI, robotics, energy, cybersecurity, and smart infrastructure — replacing exam-centric schooling.
Digital Economy & AI Agenda	Youth-built prototypes and live data sets feeding national digital transformation programmes (Nour, National AI Programme).
Regional Balance	Nizwa positioned as Oman's Youth Tech Hub — decentralising innovation beyond Muscat, leveraging UTAS Nizwa proximity.
Innovation & Higher Education	On-campus applied tech college directly connected to MoHERI and UTAS Nizwa — no gap between school and higher education.
Identity & Values	Tech & Tarbiyat framework ensures every mission embeds Omani culture, Arabic language, and Islamic ethics.
World-Class Infrastructure	Campus designed to global standards — showcasing Oman's ambition and capability to the world.

4. THE DISRUPTIVE CONCEPT — WHY THIS IS DIFFERENT

Most advanced schools integrating STEM, robotics, or AI still retain conventional structures — period-wise timetables, exam-centric assessment, and labs as supplementary add-ons. Tarbiyat National Youth Tech Missions School & College is structurally and physically different at its core:

Conventional / STEM School	Tarbiyat World-Class Youth Tech Missions Campus
Labs are supplementary spaces	12 world-class mission labs ARE the primary learning environment
Subjects taught in periods	Learning organised around long-form national missions — real problems, real solutions
Exams define achievement	Mission portfolios, working prototypes & community impact define achievement
School and college are separate	Seamless Grade 5 → Grade 12 → Applied Tech Diploma on one residential campus
Students commute home daily	500-bed residential hostel — full boarding campus with 24×7 care and energy
STEM is purely technical	Tech & Tarbiyat: every mission embeds ethics, service & Omani identity
Generic STEM school building	Iconic Nizwa Fort-inspired architecture — world-class, internationally recognized
Students receive knowledge	Students produce solutions — functioning as junior national researchers

5. ACADEMIC & PEDAGOGICAL MODEL (GRADES 5–12)

The academic architecture is built on the INSPIRE Method™ — a proven institutional development framework originated by Dr. Sudhir Pawar (Dr. Salahuddin) — which connects intellectual curiosity to purposeful, mission-driven national outcomes. Learning is not delivered through subjects; it is discovered through solving real problems for real communities.

5.1 Four Phases of Learning

PHASE 1 Grades 5–6

Discovery — Exploration Across All Labs

- ▶ Students rotate weekly across all 12 world-class mission labs through playful, hands-on challenges.
- ▶ Core subjects (Arabic, Islamic Studies, English, Maths, Science) taught inside labs — e.g., Arabic reflections on a robotics challenge.
- ▶ Goal: Build curiosity, identify early strengths, eliminate the fear of technology.

PHASE 2 Grades 7–8

Foundations — 6 to 8-Week Mini Missions

- ▶ Desert Water Saver | Safe Bus Stop | Smart Date Farm | School Energy Saver.
- ▶ Each mini-mission: field study in Nizwa region, prototype development, Python/data skills, ethics & community reflection.
- ▶ Goal: Confidence to take a problem from question to prototype.

PHASE 3 Grades 9–10

Specialization — Students Select Mission Tracks

- ▶ AI & Data for Public Services | Renewable Energy & Climate
- ▶ Mobility & Smart Logistics (EV, ports, drones) | HealthTech & Assistive Devices
- ▶ Space & Remote Sensing | Smart Infrastructure & Civil Technology

PHASE 4 Grades 11–12

Pre-University R&D — Two-Year Grand Missions

- ▶ Start-up style teams co-supervised by PDO, OQ, Omantel, Asyad, or Royal Oman Police.
- ▶ Deliverables: working prototype, technical dossier with business plan, ethics & community impact report (Arabic + English).
- ▶ Goal: Graduates ready to contribute to Omani national industry from Day 1.

5.2 Daily Rhythm

Morning Session	Mission work — field data, design, building, testing in world-class labs
Midday Block	Skills sprints — maths, physics, coding, language linked to active mission
Afternoon Session	Reflection, documentation, peer review, community interaction
Evening (Hostel)	Mentored study, innovation clubs, cultural programmes, sports
Teacher Role	Mission coaches and engineers-in-residence — co-creating solutions with students

6. INTEGRATED YOUTH TECH MISSIONS COLLEGE (POST-GRADE 12)

Students transition directly into the on-campus Tarbiyat Youth Tech Missions College — affiliated with MoHERI and UTAS Nizwa — without interruption, without relocation, and without starting over.

6.1 Programmes (2–3 Year Diplomas / Applied Degrees)

- Applied AI & Data Systems
- Renewable Energy Systems and Micro-Grids
- Mechatronics & EV Technology
- Cybersecurity & Critical Infrastructure Protection
- Health Informatics & Assistive Technologies
- Space Technology & Remote Sensing Applications

6.2 Academic Model

- Every student completes at least one major industry or government project to graduate.
- Programmes co-designed with UTAS Nizwa — credit transfer pathway to Bachelor and Master programmes.
- MoHERI research grants and national innovation competitions integrated into student missions.

7. TECH & TARBIYAT — CHARACTER & BEHAVIOUR FRAMEWORK

The Three Circles of Tarbiyat

Aql (Mind): Scientific thinking, coding, research, and engineering. **Qalb (Heart):** Empathy, humility, teamwork, community service. **Seerah (Identity):** Islamic ethics, Omani culture, national service.

- ▶ Every mission includes a mandatory service component — assistive devices for elderly, mosque accessibility, support for citizens with disabilities.
- ▶ Students maintain Arabic reflection journals guided by Islamic principles and Omani social values.
- ▶ Regular community open days in Nizwa — families, imams, and local leaders visit, test, and critique student projects.
- ▶ This framework directly supports Vision 2040's pillar of a cohesive, proud, and values-led Omani society.

8. WORLD-CLASS CAMPUS DESIGN & INFRASTRUCTURE

This campus will be among the finest educational institutions in the Arab world.

Every facility is designed to inspire, motivate, and equip Omani youth to lead the world.

8.1 Architectural Identity

Turath Meets Technology — Nizwa Fort-inspired facades, Mashrabiya screens, traditional Omani arches merged with soaring open interior mission studios, full natural light, and contemporary world-class design. The campus will be an internationally recognizable landmark for Nizwa and for Oman.

8.2 Academic Facilities

High-Tech Mission Labs (12)	Robotics Arena AI & Machine Learning Lab Cybersecurity Operations Centre Solar & Renewable Energy Lab Drone & IoT Control Studio EV & Mechatronics Workshop Biotech & Health Innovation Lab Space & Remote Sensing Lab Smart Cities & Civil Tech Lab 3D Printing & Fabrication Studio AR/VR Innovation Lab Materials Science Lab
Smart Classrooms (24)	Fully digital, interactive smart boards, wireless connectivity, AI-enabled learning management systems — no traditional blackboard classrooms
Grand Auditorium	1,000-seat world-class auditorium for national events, mission showcases, conferences, cultural programmes, and graduation ceremonies
Applied Tech College Wing	Dedicated college block — advanced labs, seminar rooms, industry interface centre, faculty offices, student co-working spaces
Innovation & Maker Space	Open 24×7 fabrication and innovation hub — where students can work on missions at any hour, supported by resident engineers
Central Library & Knowledge Centre	Digital-first, AI-powered research library with physical archives, study pods, collaboration rooms, and maker corners
Conference & MoU Centre	Professional conference facility for government and industry partner meetings, mission reviews, and national programme events

8.3 Residential & Student Life Facilities

Student Hostel — 500 Beds	World-class fully-furnished residential hostel — single and twin rooms, common rooms, study halls, prayer spaces, and recreation areas; separate wings for male and female students
----------------------------------	---

Faculty & Staff Residences	On-campus residential quarters for 50+ resident faculty and implementation team members — fully furnished, high-quality housing
Dining & Cafeteria Complex	Multi-cuisine Halal dining facility — capacity 800 per sitting, separate dining for students, faculty, and guests
Student Health Centre	On-campus medical clinic staffed 24×7, counselling centre, and wellness programme
Sports & Recreation Complex	Multi-sport courts, indoor gymnasium, swimming pool, running track, outdoor sports ground, and recreational common areas
Prayer & Reflection Facilities	Grand mosque / musalla on campus — central to the Tarbiyat framework; open for students, staff, and community

8.4 Power, Connectivity & Smart Campus Infrastructure

24×7 Uninterrupted Power	500 kW solar rooftop + 1 MWh battery storage system + diesel generator backup — zero power interruption, ever
High-Speed Connectivity	Fibre optic campus backbone 10 Gbps internal network Campus-wide enterprise Wi-Fi 6 Dedicated research network for labs
Smart Campus Management System	AI-driven building management: energy, access control, CCTV, environmental monitoring, maintenance scheduling
Data Centre (On-Campus)	Tier-2 on-campus data centre housing student research data, campus systems, and mission project repositories — owned by Government of Oman
Green Campus	LEED-certified design Greywater recycling Smart irrigation Native landscaping Zero single-use plastics policy
Emergency & Safety Systems	Full fire suppression, emergency response protocols, controlled access, 360° CCTV, and 24×7 security team

9. GOVERNANCE, OWNERSHIP & OMANIZATION

9.1 Ownership — Absolute & Non-Negotiable

All land, buildings, laboratories, equipment, technology systems, and physical assets are owned 100% by the Ministry of Education / Government of Oman from Day 1. Tarbiyat Sociotech Foundation holds zero equity and zero asset claim at any point during or after the engagement.

9.2 Proposed Governing Board

Ministry of Education	3 Members — Academic oversight and national school integration
MoHERI / UTAS Nizwa	2 Members — Higher education linkage and research agenda
MOCIIP / Industry	1 Member — Industry partnership and investment promotion
Tarbiyat Sociotech Foundation	1 Member — Academic and technical advisory (non-voting on ownership matters)

9.3 Omanization Roadmap

Year 1	Minimum 70% Omani staff across teaching, labs, and administration
Year 2	Minimum 80% Omani staff — Omani teachers co-leading mission studios
Year 3	90% Omani staff — full operational management with Foundation oversight
Year 5	Full Omani academic and administrative leadership in place
Year 7	Foundation team in pure advisory capacity — Oman self-sufficient
IP Policy	All mission-generated IP co-owned by Omani state and students; commercialisation through Omani incubators

10. IMPLEMENTATION PARTNERSHIP — CONCEPT & TEAM

10.1 Concept Origin & Intellectual Authorship

Dr. Sudhir Pawar (alias Dr. Salahuddin)

Founder, Concept Architect & Institutional Design Lead

- ▶ Over 20 years of dedicated experience in educational institutional development across India.
- ▶ Established and guided numerous educational institutions — pharmacy colleges, nursing colleges, law colleges, CBSE schools, and paramedical institutions.
- ▶ Author of the INSPIRE Method™ — a landmark pedagogical and institutional development framework.
- ▶ Author of the Institutional Compliance Manual & Handbook for India — a definitive reference for educational compliance in India.
- ▶ Founder, SR World Solutions (legal.srworlds.in) | IRME Institute (irme.in) | Tarbiyat Sociotech Foundation.
- ▶ The idea, concept, and architectural vision for this campus originated with Dr. Pawar — who brings both pedagogical innovation and deep institutional implementation experience to this proposal.

10.2 Core Implementation Team — Global Industry Leaders & Innovators

Resident Implementation Commitment

Tarbiyat Sociotech Foundation will deploy a handpicked core team of 10 to 15 global industry leaders and domain innovators — professionals with demonstrated track records in world-class educational institution building, advanced technology lab commissioning, and national human capital programmes. This team will be resident in Oman for the full duration of the engagement, embedded within the campus, and accountable directly to the Governing Board.

Project Director	Senior industry leader — overall implementation accountability to Governing Board
Academic Lead (School)	World-class pedagogist — mission curriculum design, teacher coaching, assessment framework
Academic Lead (College)	Senior academic — applied diploma programmes, MoHERI and UTAS coordination
Lab Commissioning Engineers	Domain innovators — setup, calibration, and operation of all 12 world-class mission labs
Pedagogy & Teacher Trainer	Expert in mission-based and project-based learning — ongoing faculty capacity building

Technology & Smart Campus Lead	Senior tech leader — ICT infrastructure, smart campus systems, data centre, cybersecurity
Community & Partnerships Lead	Industry veteran — sectoral ministry, university, and mission client relationship management
Finance & Compliance Officer	Senior professional — budget management, procurement, Government reporting
Quality Assurance Lead	International standard — academic outcomes, accreditation, annual performance review
Hostel & Student Life Manager	Senior hospitality and student welfare professional — 24×7 residential campus management

10.3 Government Support Required for the Foundation Team

In order for the Foundation's global team to be fully committed and resident in Oman, the Government of Oman is requested to provide the following under the formal Implementation Agreement:

Support Requirement	Details
Long-Term Residency Visas	Multi-year professional / project visas for 10–15 Foundation team officials for the full engagement period — with family visas where applicable
Quality Accommodation	Comfortable, furnished residential accommodation in or near Nizwa, appropriate to senior professional standing — provided or fully arranged by the Government; on-campus faculty residences preferred
Travel Support	Initial relocation travel covered; minimum two return home-country visits per year per team member throughout the engagement period
Competitive & Respectful Salary	Monthly remuneration benchmarked to senior international professional standards in Oman — budgeted within the project OPEX; commensurate with the seniority and global calibre of team members
Professional Recognition	Full recognition as senior project officers of the Government of Oman's flagship campus — appropriate access, institutional support, and professional standing
Healthcare Coverage	Full health insurance coverage for team members and immediate family under Oman's healthcare system or equivalent private scheme

10.4 Engagement Terms — Minimum 10 Years

Minimum Engagement: 10 Years — Non-Negotiable for Institutional Success

This implementation partnership is proposed for a minimum period of ten (10) years from the date of formal commencement. This duration is essential for the academic pipeline to

mature (Grade 5 students reaching the applied college by Year 8), for the Omanization plan to reach full fruition, and for the campus to establish its national and international reputation. At the end of 10 years, the partnership shall be reviewed jointly by the Government of Oman and Tarbiyat Sociotech Foundation — with options to renew, extend, or transition to full Omani management.

This is a nation-building partnership — built on transparency, aligned to national interest, and committed to leaving Oman stronger than we found it.

11. COLLABORATIONS & PARTNERSHIPS

Universities & Higher Education

- ▶ University of Technology & Applied Sciences (UTAS) Nizwa — co-designed curricula, co-supervised projects, shared labs, pathways to Bachelor programmes.
- ▶ Other Omani universities — joint research projects and faculty exchanges.

Government Ministries & Agencies

- ▶ Ministry of Education — academic oversight, national school system integration.
- ▶ MoHERI — research grants, innovation challenges, national research agenda.
- ▶ Sectoral Ministries (Health, Transport, Energy, Environment, Municipalities, Interior) — as mission clients providing real problems and data.

State-Owned Companies & Private Sector

- ▶ PDO, OQ, Omantel, Asyad, Royal Oman Police — mission co-supervisors, project partners, internship hosts.
- ▶ Local Omani SMEs — co-develop student prototypes into marketable products.

International Technical Partners

- ▶ Select Indian institutions and global technology companies (Siemens, Microsoft, Google, IBM, Cisco) for capacity building, certifications, and exposure visits — fully under Omani regulations.

12. IMPLEMENTATION ROADMAP — 24 MONTHS TO LAUNCH

Phase	Key Milestones
Months 0–3 Approval & MOU	MOU and land allotment finalised. Joint Steering Committee established (MoE, MoHERI, MOCIIP, Foundation). Concept design approval. Foundation team visa processing and phased relocation to Oman.
Months 4–6 Master Planning	Detailed architectural master plan approved. Structural engineering consultancy engaged. Lab specifications finalized. LEED and accessibility compliance designed in from the start.
Months 7–18 Construction	Campus construction — G+4 main academic building, hostel block, auditorium, sports complex, power infrastructure. Parallel procurement of 12 mission labs and smart classroom systems. Maximum local contractor sourcing.
Months 19–21 Commissioning	Lab installation, calibration, and testing. Smart campus systems commissioned. Recruitment and appointment of initial Omani leadership, teacher cohort, and lab coaches. Intensive teacher training begins.
Months 22–24 Readiness	Student admission campaign — Nizwa, Al Dakhiliyah, and all governorates. Partnership MOUs with ministries, universities, and industry signed. Full campus readiness review by Governing Board. Formal inauguration event.
September 2028 Grand Opening	Tarbiyat National Youth Tech Missions School & College opens. First cohort of 500 students begins. Oman's most advanced Youth R&D Campus is live.

13. FINANCIAL SUMMARY — OMR 38,500,000 (APPROX. ₹840 CRORE)

This budget reflects the true cost of building a world-class, internationally benchmarked Youth Technology Missions Campus — one that will stand as a proud national asset for the Sultanate of Oman for generations. Comparable institutions globally require equivalent or higher investment. Every Rial is invested in Oman's future.

13.1 Capital Expenditure (CAPEX) — OMR 33,000,000

CAPEX Item	OMR	Approx. ₹ Crore
Site Development, Master Planning & Civil Works (60,000 sqm campus)	4,500,000	~98 Cr
Main Academic Building — G+4 (30,000 sqm, world-class construction)	9,000,000	~197 Cr
Grand Auditorium — 1,000 Seat, fully equipped	2,500,000	~55 Cr
Student Hostel — 500-Bed World-Class Residential Block	3,500,000	~77 Cr
Faculty & Staff Residences — 50+ units on campus	1,500,000	~33 Cr
Sports Complex — Multi-sport courts, gym, pool, track	1,200,000	~26 Cr
12 World-Class Mission Labs — Full equipment & technology	5,000,000	~109 Cr
24 Smart Classrooms — Full digital & interactive technology	1,800,000	~39 Cr
Innovation & Maker Space — Open 24×7 fabrication hub	600,000	~13 Cr
Conference & MoU Centre	400,000	~9 Cr
Central Library & Knowledge Centre — AI-powered	500,000	~11 Cr
On-Campus Data Centre — Tier 2	400,000	~9 Cr
24×7 Power: 500 kW Solar + 1 MWh Battery + Generator Backup	900,000	~20 Cr
Fibre, Wi-Fi 6, Smart Campus Management System	600,000	~13 Cr
Dining Complex — 800-seat capacity	500,000	~11 Cr
Health Centre, Mosque, Green Landscaping, Accessibility	600,000	~13 Cr
LEED Certification, Safety Systems, CCTV, Access Control	400,000	~9 Cr
Design, Architecture, Project Management Fees	800,000	~17 Cr

CAPEX TOTAL	33,000,000	~720 Crore
-------------	------------	------------

13.2 Operational Expenditure (OPEX) — First 3 Years — OMR 5,500,000

OPEX Item	OMR	Approx. ₹ Crore
Salaries — ~180 Staff (Teaching, Labs, Admin, Hostel, Operations)	2,500,000	~55 Cr
Foundation Core Team — 10–15 Global Professionals (3 years)	1,200,000	~26 Cr
Teacher Training, Curriculum Development, Mission Design	400,000	~9 Cr
Lab Consumables, Mission Materials & Research Supplies	500,000	~11 Cr
Utilities, Maintenance & Facility Management (3 years)	450,000	~10 Cr
Student Programmes, Community Events, National Showcases	200,000	~4 Cr
Technology Licenses, Software, Subscriptions	150,000	~3 Cr
OPEX TOTAL (3 Years)	5,500,000	~120 Crore

GRAND TOTAL PROJECT INVESTMENT (CAPEX + 3-Year OPEX)	OMR 38,500,000	~₹840 Crore
---	-----------------------	--------------------

In-Country Value (ICV): Approximately 85% of total project spend is retained within Oman — through local contractors, Omani suppliers, Omani staff salaries, and domestic operational expenditure — meeting and exceeding standard ICV thresholds.

14. EXPECTED OUTCOMES & NATIONAL IMPACT (YEAR 5–10)

Impact Area	Expected Outcome
Human Capital	500+ Grade 12 graduates per year; 250+ applied tech diploma graduates per year from the on-campus college by Year 10.
Innovation Output	60–100 mission projects annually; 15–20 reaching field implementation or pilot stage; youth-generated prototypes deployed across energy, logistics, health, and infrastructure.
Omanization	90% Omani staff by Year 3; full Omani academic and administrative leadership by Year 5–7.
IP Sovereignty	All mission IP anchored in Oman and co-owned with the state — zero IP extraction by the Foundation partner.
Social & Cultural Impact	A generation of Omani youth who see technology as a tool for service, sustainability, and national pride — aligned with Vision 2040.
International Recognition	A campus that attracts global attention, international academic visitors, and positions Oman as a leader in youth innovation education.
Replication	Nizwa proof-of-concept scaled to other governorates — a national education reform model, not a one-off institution.

15. RISK ASSESSMENT & MITIGATION

Risk	Level	Mitigation Strategy
Regulatory Approval Delays	Medium	Joint Steering Committee from Month 1; early MoE/MoHERI concept engagement; legal framework pre-mapped.
Construction Complexity at Scale	Medium	Phased construction plan; local Omani construction companies prioritised; international QA consultant engaged from Day 1.
Teacher Readiness for Mission Pedagogy	Medium	3-month intensive pre-opening training; monthly on-campus coaching Year 1; INSPIRE Method™ master trainer on team.
Student & Family Acceptance	Low	Arabic-language community campaign from Month 20; open campus days; Tarbiyat values communication — aligned with Omani families' expectations.
Foundation Team Adaptation	Low	Team selected with prior international project experience; Omani cultural orientation; full Government support infrastructure in place.
Lab Procurement & Quality	Low	Early tendering; full technical specifications from Foundation engineers; global suppliers with Oman track record preferred.
Financial Overrun	Low	Conservative budgeting with 8% contingency; Governing Board quarterly financial review; transparent Government reporting.
Hostel & Residential Management	Low	Professional hospitality management lead on team; standard Omani boarding school regulations applied; 24×7 on-campus medical and security.

16. CONCLUSION & FORMAL REQUEST

Tarbiyat National Youth Tech Missions School & College is not a construction project.

*It is Oman's promise to its children —
that their curiosity, guided by faith and identity, will build the Sultanate's future.*

Through this proposal, Tarbiyat Sociotech Foundation — under the concept authorship of Dr. Sudhir Pawar (Dr. Salahuddin) — respectfully presents a Vision 2040 implementation project of profound and enduring national significance. This world-class campus will empower Omani children to design, build, and lead the technologies of tomorrow — rooted in their faith, culture, and loyalty to the Sultanate of Oman. The Foundation commits its finest global professionals, its proven institutional frameworks, and its full organisational energy to making this vision a reality on Omani soil.

We Respectfully Request:

- 01 A formal presentation meeting with the Ministry of Education, MoHERI, and MOCIIP to present this concept in full detail.
- 02 Consideration for land allocation (minimum 60,000 sqm) in the Nizwa Education Cluster and in-principle approval to proceed with detailed design and legal structuring.
- 03 Guidance on aligning all academic, legal, and financial frameworks with the laws and regulations of the Sultanate of Oman.
- 04 Formal initiation of the Implementation Agreement, including provisions for Foundation team residency visas, quality accommodation, periodic home travel, healthcare coverage, and competitive professional remuneration — as outlined in Section 10.
- 05 Mutual commitment to a minimum 10-year partnership, reviewed jointly at the end of the term, with full transparency and shared national purpose.
- 06 Government of Oman's full funding of the project (OMR 38,500,000) with phased disbursement tied to construction and commissioning milestones.

Respectfully submitted with complete commitment to the Sultanate of Oman and its Vision 2040,

Dr. Sudhir Pawar (alias Dr. Salahuddin)
