Mission:
Preparing the
Indian common
students for
building a new
age india,
empowering
with mindset
of building
technology

**Building a Strong Foundation for Mastering
The Future of Technology**

INSPIRATION

inspired by the visionary **Dr. APJ Abdul Kalam, the Missile Man of India**, our Kalam Technopreneurship program aspires to nurture the next generation of innovators by empowering, resourcing, and facilitating common Indian students. Our mission is to instill the foundational knowledge of future technologies through a practical-based learning approach. By offering hands-on experience in artificial intelligence, coding, robotics, the Internet of Things (IoT), cybersecurity, cloud computing, big data, virtual/augmented reality (VR/AR), and blockchain, we aim to cultivate skilled technopreneurs who can drive India's leadership in global peace and prosperity. Through this initiative, we hope to produce more "Kalam"s who will revolutionize the technology landscape and contribute significantly to India's progress and standing in the world.

The **Tarbiyat Sociotech Foundation**, with its registered office in New Delhi and a regional office in Dehradun, stands as a beacon of innovation and empowerment under the leadership of its visionary directors, Mr. Ashraf Zaheer Hashmi and Dr. Sudhir Pawar. Mr. Hashmi, a renowned social worker since 1995, brings a wealth of experience and dedication to social causes, while Dr. Pawar, as CEO, contributes his expertise as an educationist and author focused on innovation in education and technology. Together, they steer the foundation towards achieving its mission of transforming India's workforce.

The Kalam Technopreneurship Programs, a flagship initiative of the foundation, aim to empower future generations by transforming job seekers into job creators. These programs focus on equipping individuals with cutting-edge technological skills, fostering a mindset shift necessary for thriving in the global technological arena. By emphasizing skill development and innovative thinking, the Tarbiyat Sociotech Foundation is committed to helping India lead in the world's technological race, ensuring that the nation's people are prepared to meet and create opportunities in an ever-evolving landscape.

STARTING IN DEHRADUN

Madarsa Anwarul Quraan Dehradun

Madarsa students showed their deep interest in learning new technology from scratch. The Anwarul Quraan Madarsa Mohatmim, Moulana Noor Elahi sahab has provided us the space and students willing to learn the future technology and supported us in all means he has.

These students together learning the Quraan and other islamic curriculum. We have smartly embeded the technology program along with the existing syllabus they are learning.

We have started with only two hours a day to our program.

Technology seedig graph

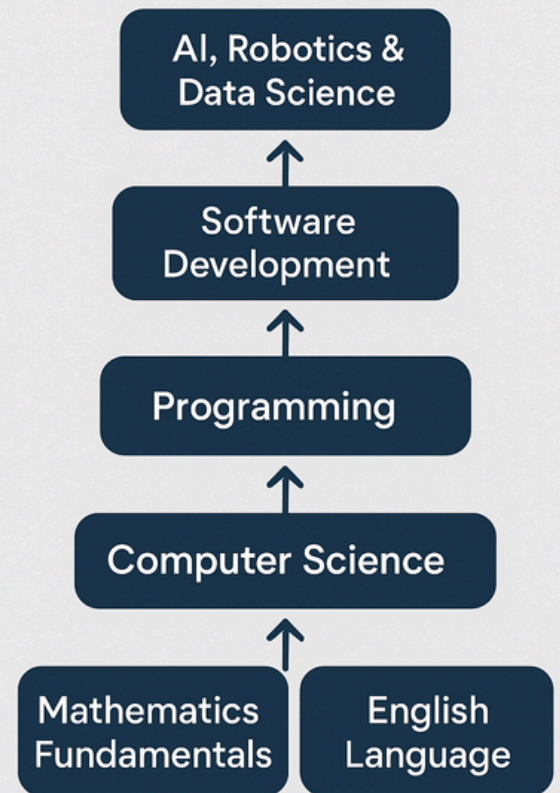

We have a practical and achievable plan to help Madarsa students learn the latest technology from scratch.

This is not mere boasting or empty dreaming — our roadmap is carefully designed by top tech engineers and educators.

By following this structured path of Mathematics, English, Programming, Computer Science, Software Development, and cutting-edge fields like AI, Robotics, and Data Science, we believe our students will not only secure employment but also gain the power to build the world's next great technology companies.

Our mission is clear: students should not remain ordinary degree or diploma holders merely seeking jobs. Instead, they will be prepared to earn respectable work opportunities worldwide or create their own innovative workplaces and enterprises in any part of the globe.

MASTERING TECHNOLOGY FROM SCRATCH

EMPOWERING NATION
THROUGH TECHNOLOGY
BREEDING GENERATION OF
INNOVATORS AND TECH
LEADERS FROM COMMON
INDIAN SOCIETY

We call for support

As a purely charitable initiative, we seek your helping hand to fulfill this mission of empowering Madarsa students with cutting-edge technology education.

Even your smallest contribution can make a big difference in this nation-building cause.

Your support will help us cover the essential costs of:

- Technological Labs
- Expert Trainers
- Student Training Programs
- Administration & Resources

♥ Please scan the QR code to send your love directly to the Tarbiyat Sociotech Foundation bank account, or reach out to us if you wish to offer continued support.
