

Kalam Innovation Research Academy (KIRA)

The World's First Research Incubator School from Grade 1

Inspired by Dr. A.P.J. Abdul Kalam's vision, KIRA will nurture children into innovators, researchers, and technopreneurs by age 18 - producing graduates with patents, publications, and startups before college.

Our Vision & Mission

Vision

Create the world's first Indian-origin "Research Incubator School" where technology exposure starts from Grade 1, nurturing children into innovators who excel academically while filing patents, publishing papers, and launching startups.

Mission

- Reimagine education: Blend CBSE with 60-70% practical innovation labs
- Produce creators, not job seekers
- Cultivate ethical innovators for sustainability and inclusive growth
- Open 20-30% seats for underprivileged/madarsa students

How KIRA Stands Apart

Compared to Indian Schools

Indian norm: CBSE/ICSE focus on exams, rote learning, coaching for IIT-JEE/NEET

KIRA: Focus on innovation outcomes – patents, startups, global projects. Assessment via portfolios, not exams.

Compared Globally

Global examples: High Tech High (USA), TKS (Canada), Minerva University (USA)

KIRA's uniqueness: Begins at age 6 (Grade 1), not at university/teen years. Students grow in a living lab ecosystem unmatched globally.

Academic Journey: Grades 1-5

Early Curiosity Labs (Ages 6-10)

Project-Based Academics

NCERT basics taught via projects (fractions via coding a pizza game, science via dismantling gadgets)

Daily Tech Hour

Scratch, block coding, LEGO robotics, digital art

Creativity Labs

Storytelling, design, maker crafts

Ethics & Values

Simple lessons in digital citizenship and innovation for good

Academic Journey: Grades 6–8

Foundation Research Fellows (Ages 11-13)

Project-Integrated Learning

Math, science, and English taught through hands-on projects

Tinker Labs

IoT sensor kits, Arduino basics, robotics prototypes

Mini Research Projects

Students publish short papers/journals

Additional elements: Cultural integration of Islamic/Indian philosophy with science ethics; exposure visits to ISRO, IIT labs, and local innovators

Academic Journey: Grades 9–12

Innovation Apprentices (Ages 14–15)

- Tech Specializations: Python, AI basics, cybersecurity
- Research Apprenticeships with IITs, DRDO, industry labs
- Innovation Challenges solving SDG problems
- Failure Festivals celebrating experimental mindset
- Virtual MIT/Stanford exchange projects

Tech Leaders (Ages 16–18)

- Year-long research theses (neuromorphic chips, quantum computing)
- Incubator Program with real startups, patent filings
- Global exposure at TEDx Youth, international journals
- "Kalam Fellows" mentoring younger students
- Graduate with patent application, research paper, startup prototype

Daily Routine & Assessment

Daily Schedule Integration with CBSE

7 AM	Wellness & techno-ethics (Yoga, digital responsibility)
8-12 PM	CBSE Core subjects (integrated with projects)
1-3 PM	Tech Labs (AI, robotics, coding)
4-6 PM	Research, incubation, or clubs
Evening	Innovation clubs, open-source contributions

Assessment System

No rote exams

- Portfolios & prototypes
- Publications & patents
- Impact scores
- Peer review
- Quarterly "Innovation Defense" (mini PhD viva)

Global & National Impact

For India

- Breaks the cycle of rote-learning + unemployment
- Creates innovators at 18 instead of graduates at 25
- Bridges madarsa + mainstream gap through scholarships

For the World

- India becomes a hub for youth innovation exports
- Global collaboration on solving climate, energy, health challenges
- Establishes a rare school-to-startup pipeline

"Where a 12-year-old builds robots, a 15-year-old publishes AI research, and an 18-year-old launches a startup — all before college."

Infrastructure & Financial Model

Infrastructure (₹12-15 Cr Model)

- Tech Labs: Robotics, AI/ML, Quantum access, IoT
- Failure Lab: Safe space to experiment
- Idea Vault: Student innovation portfolio archive
- Innovation Incubator: On-campus startup ecosystem
- Boarding + Day School: 60% boarding for full immersion

Financial & Growth Model

- Investment: ₹12-15 Cr in 5 years
- ROI: 300% by Year 5
- Fees: ₹3.5-4.5L/year
- Additional revenue: CSR partnerships, industry collaborations, summer innovation camps

Why the World Needs KIRA

KIRA is not just a school — it is a movement.

AI & Tech Disruption

Jobs will vanish; innovators will thrive in the new economy

India's Demographic Advantage

Harness youth into creators, not clerks

Global Leadership

India can produce the next Kalams, Musks, or Einsteins—at school level

Unique Integration

No other school combines CBSE + full-time research incubation from Class 1

KIRA will redefine how the world views Indian education: producing teenagers with global patents, startups, and research — not job applications.
